

Our launch process

7

Get a proposal

Our guaranteed, fair price is possible because we understand how projects are built and what that entails. Of course, our speed is just a perk of using our service - we aren't charging you extra for it.

Fast and fair

Learning the lingo

Review project deliverables

This is where your creative concept is translated into technical instructions that our engineers will use to create the product. This is a process that takes a special know-how to achieve fluidly, and we have nailed this down purely by doing it over and over again. Practice makes perfect, and we have the experience.

Always remain in control

With the help of your dedicated project manager, you are kept in the loop via regular status reports and referred to for decision-making. We rely on our experience to set achievable, tightly managed milestones to provide you with the current project status and a reliable timeline projection to completion.

Take it and run with it

Ownership handover

Our team facilitates a smooth, comprehensive handover powered by communication and experience. Because you have been a part of the team since the beginning, you are aware of the product and what it entails. Experience has allowed us to predict and address possible questions and confusions on your side, creating an efficient handover process.

Keep going!

We know the ins and outs of your product, which means we can easily supplement it in the future such as with new features or scaling. We love nothing more than exploring new possibilities with old clients, so we welcome you to build upon our partnership with new projects in the future.

Houston, we have a project

FAQ

Why launchcircle

My team

Our process

Why launchcircle

Is launchcircle right for me?

Do you have a great idea that you would like actualize? Then yes!

At what stages can launchcircle be incorporated into my project?

We help you bring your idea to life, whether that means defining features or simply building features. As long as you have a product concept, we can offer our expertise to help shape the rest.

How do I know that my ideas are safe with you?

Our confidentiality agreement gives you full legal rights to your own ideas so that you feel comfortable elaborating as much as necessary to best bring your idea to life.

How much does launchcircle cost?

Different projects have different requirements. By filling out a simple form under „Get a quote“, we can give you a personalized price estimation for your project. This is free and requires no commitment.

My team

How does launchcircle build my team?

Our project manager handpicks the team to align with project requirements after defining them with you. This process ensures that the most suitable talent works on your project.

How do I know that the developers who tackle my project are suited for the job

Our teams are handpicked to best fit each project need. But don't just take our word for it - check out some of our awesome [customer testimonials!](#)

Why do I have to communicate to the team through a project manager?

Our project managers are able to advise you on any unforeseen questions and present your feedback in a way that is most easily received by our engineers. Our experiences have shown that this system facilitates the greatest success all around!

I have engineering knowledge. Is a project manager really necessary?

Your engineering knowledge will certainly be a great benefit to the project. However, streamlining our approach by using the same process in our projects is one of the key factors that allows us to complete your project in such a timely manner.

Our process

What is your process?

Do you have a great idea that you would like actualize? Then yes!

What is the average time to bring a project from conception to creation/idea to reality?

While the speed of completion is generally reliant upon the complexity of the project, most of the standard apps and websites can be built in 3-4 months.

Does your speed compromise quality?

The expertise of our engineers guided by the insight of our project managers enables the team to quickly assess and engage the best approach to your project.

I want to make sure I am informed throughout the process. How will my voice be heard?

After your project kicks off, you will receive regular progress updates through your project manager. We do not begin the next step until we have your feedback and approval.

What is the average time to bring a project from conception to creation/idea to reality?

I want to make sure I am informed throughout the process. How will my voice be heard?

After your project kicks off, you will receive regular progress updates through your project manager. We do not begin the next step until we have your feedback and approval.

What if I change my mind on specifications or come up with new features during the process?

Waiting for approval before beginning on the next steps allows us to remain on the same page and address a change in specifications before creation. While we will try our best to accommodate your vision as much as possible, large changes to the project may be reflected in a change in quote. We believe in being fair not just to our client, but also our engineers.

How does the handover work?

The expertise of our engineers guided by the insight of our project managers enables the team to quickly assess and engage the best approach to your project.

What if I want to cancel the project for whatever reason?

We will only charge you the fair amount to cover the project costs at that point.
